- [8. Why can I only see a blank screen when I try to view the game card?](#)
- [9. Why is it printing a blank page, when I can see the game card just fine?](#)

## Turn off Page Headers & Footers

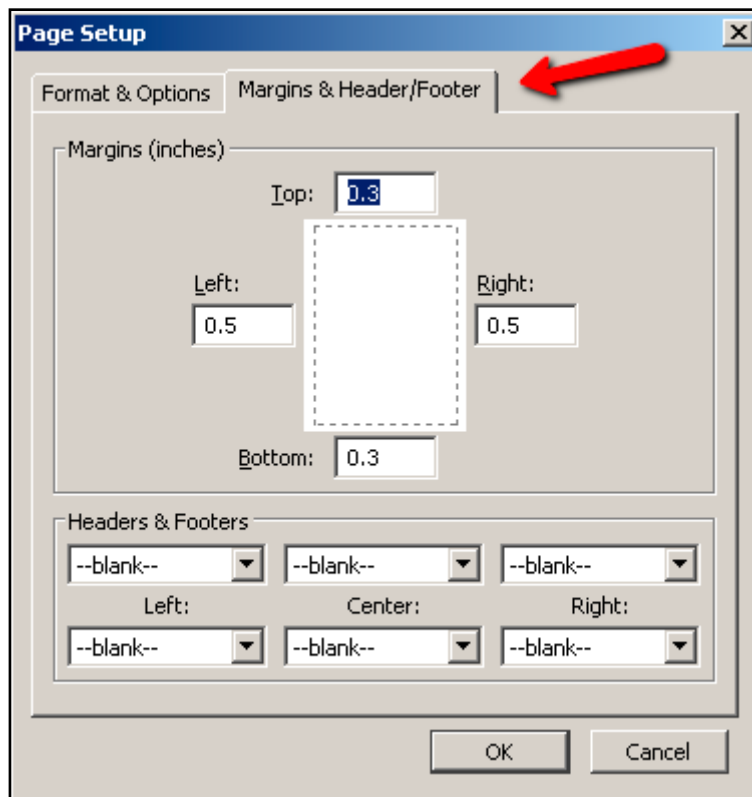

If you would like to remove the URL, date, time, and page numbers from the top and bottom of your page, you will need to turn off your Page Headers & Footers. Without removal, this can also cause your game sheet to print on multiple pages.

If the following instructions do not work for your problem, follow the [Set Margins](#) instructions.

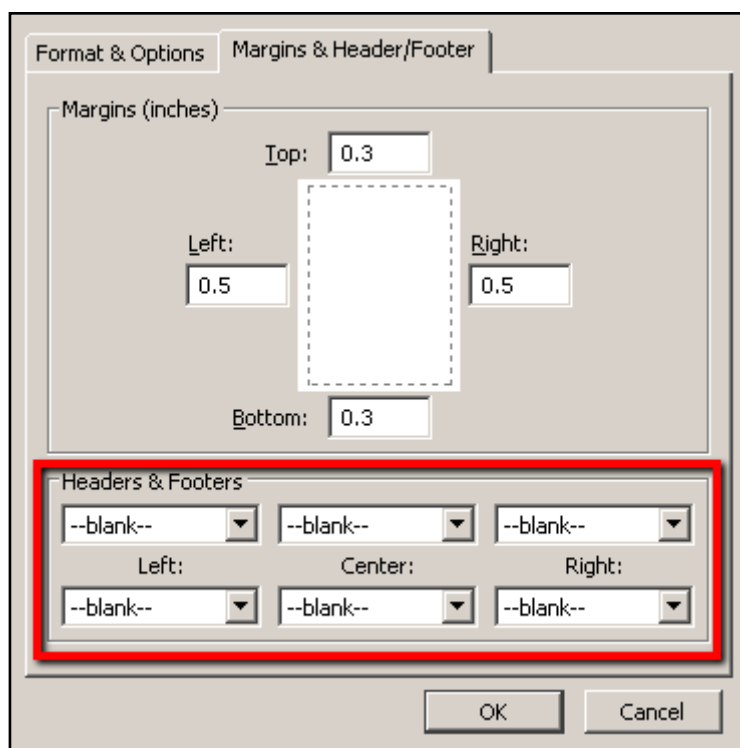

1. Select 'File' menu option -> 'Page Setup...'

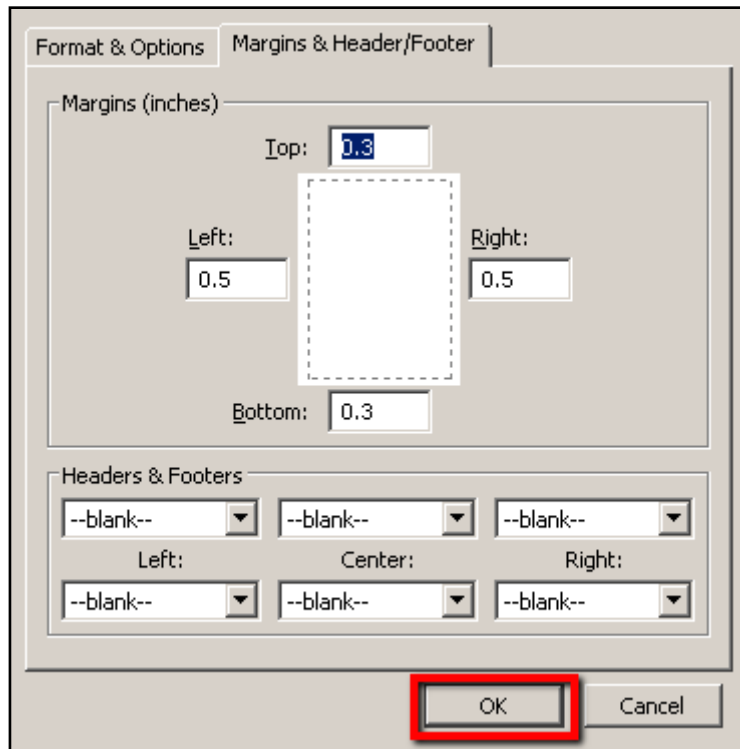

2. Select 'Margins & Header/Footer' tab

3. Select '--blank--' from all 6 drop down lists

4. Click 'OK' button

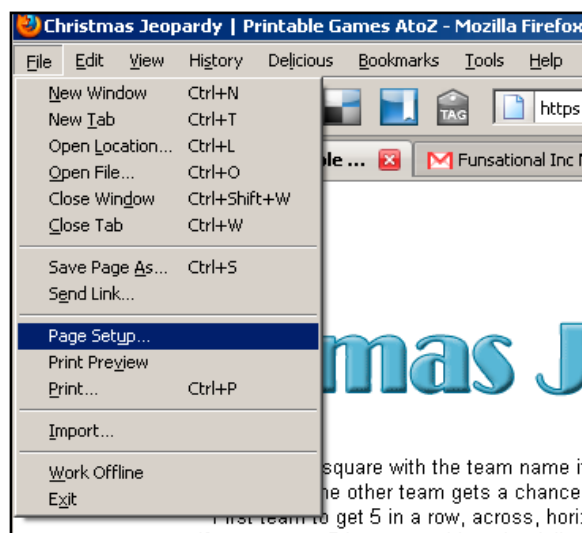

## Set Margins

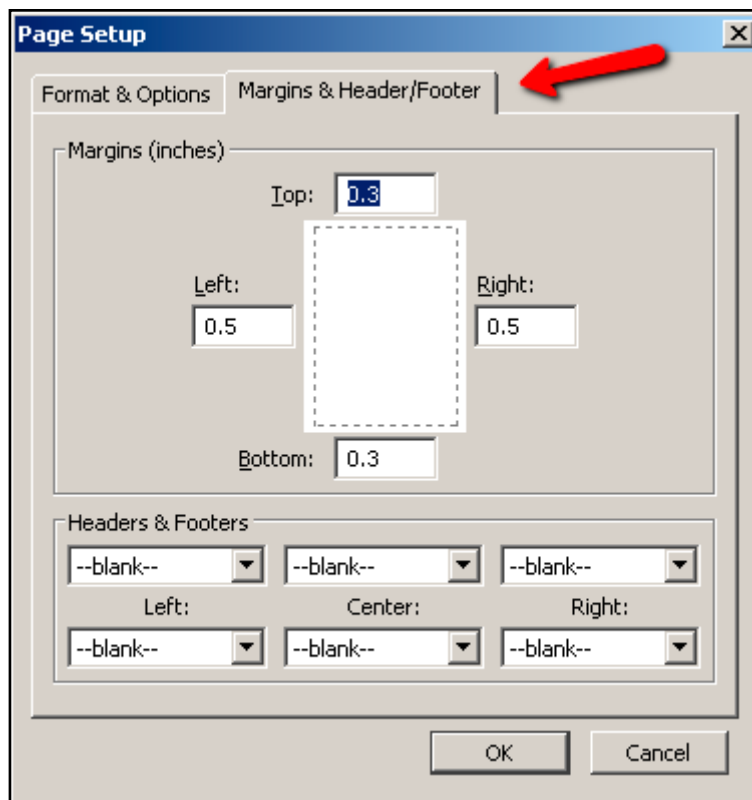

If your games are printing on multiple pages or you are printing blank pages, you will need to set your margins.

If the following instructions do not work for your problem, follow the Turn Off [Page Headers & Footers](#) instructions.

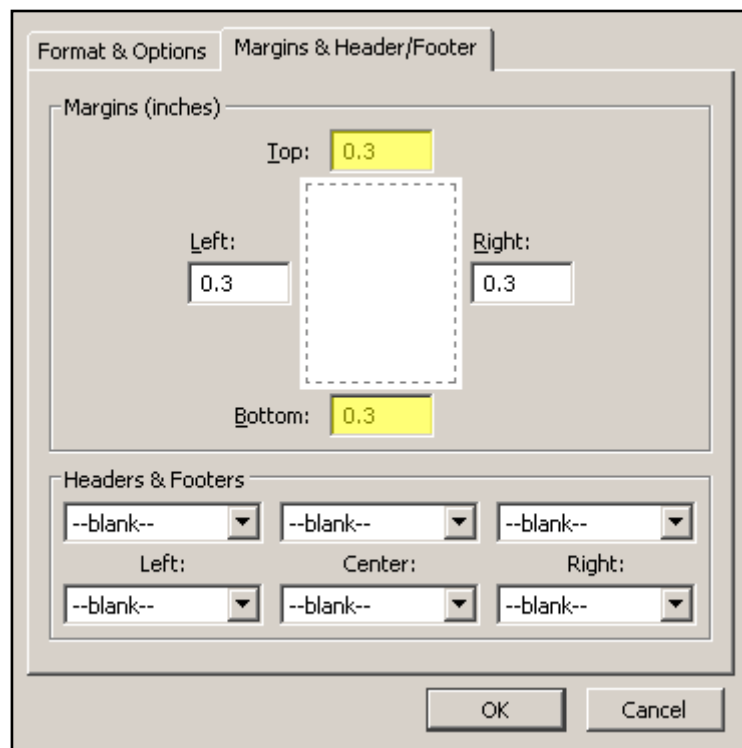

1. Select 'File' menu option -> 'Page Setup...'

2. Select 'Margins & Header/Footer' tab

3. Set top/bottom margins to 0.3

4. Set right/left margins to 0.3

The screenshot shows the 'Margins & Header/Footer' tab of a 'Format & Options' dialog box. Under the 'Margins (inches)' section, the 'Top' margin is set to 0.3. The 'Left' and 'Right' margins are both set to 0.3, with the input fields highlighted in yellow. The 'Bottom' margin is also set to 0.3. A dashed rectangular box is centered on the page. Below this, the 'Headers & Footers' section contains two rows of three dropdown menus each, all currently set to '--blank--'. The 'Left:', 'Center:', and 'Right:' labels are positioned between the rows. At the bottom right, there are 'OK' and 'Cancel' buttons.

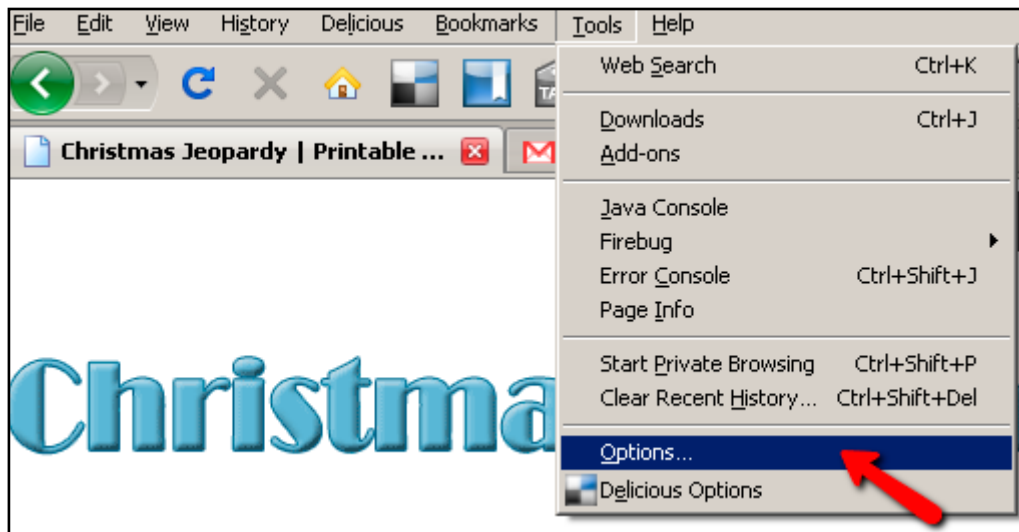

5. Click 'OK' button

This screenshot is identical to the previous one, showing the 'Margins & Header/Footer' dialog box with all margins set to 0.3 inches. However, the 'OK' button at the bottom right is now highlighted with a red rectangular border, indicating it should be clicked.

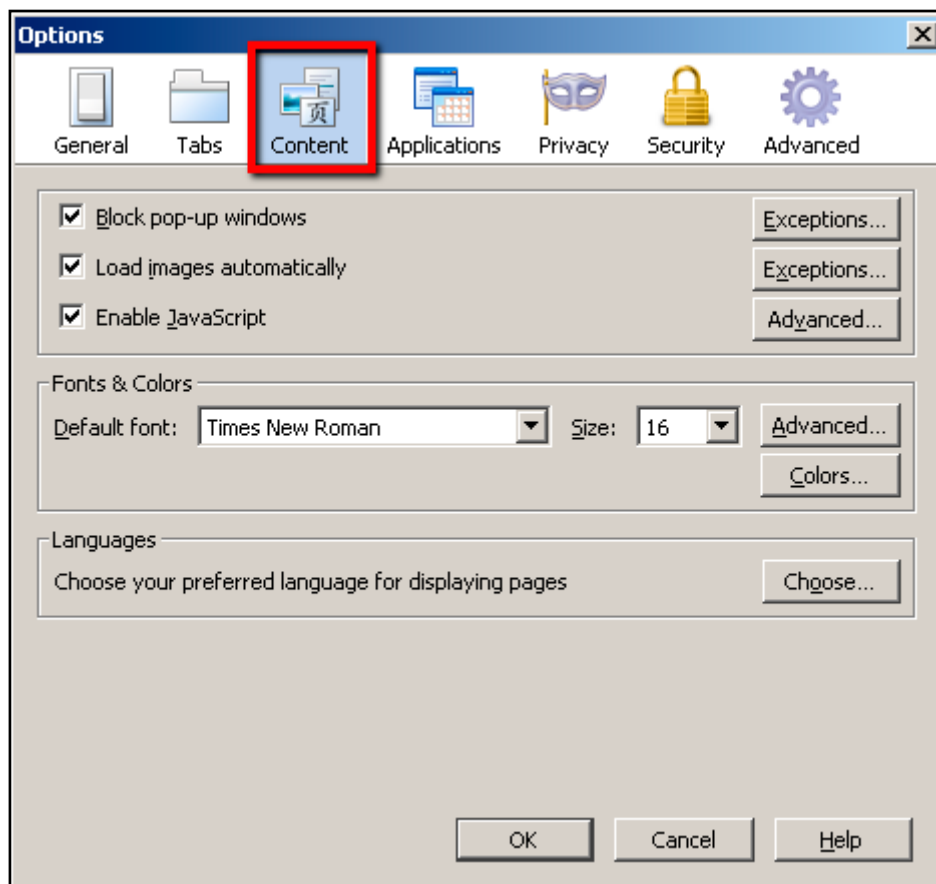

## Background Colors & Images

If all of the images on your game are not printing, lines are showing up, or you are printing blank pages you will need to make sure your printer options are set to print background colors.

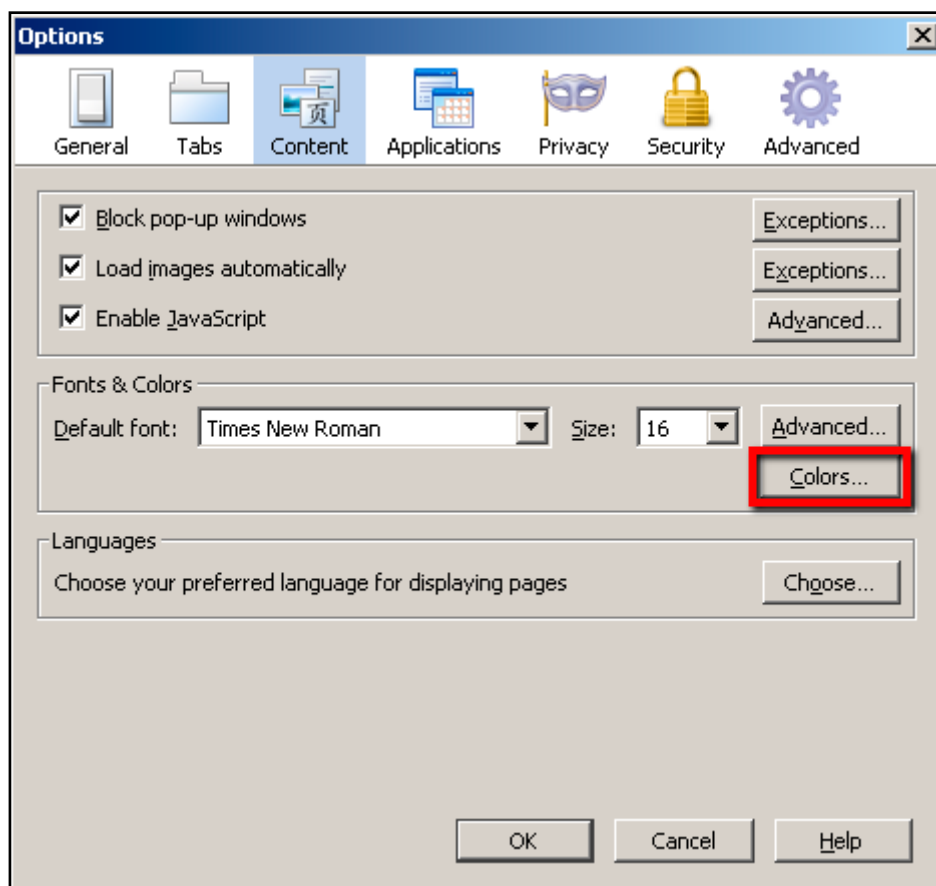

1. Select 'Tools' menu option, then Select 'Options..' option

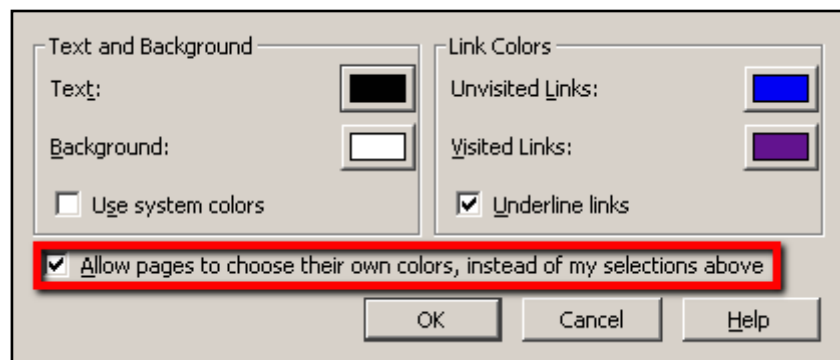

2. Click the 'Content' tab

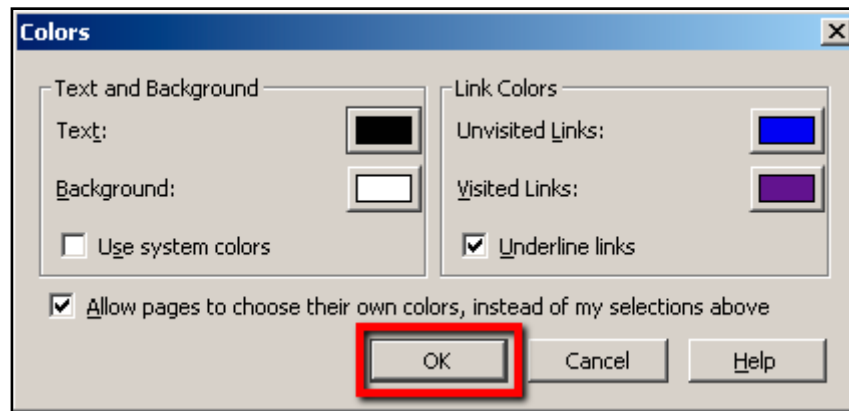

3. Click the 'Colors' button

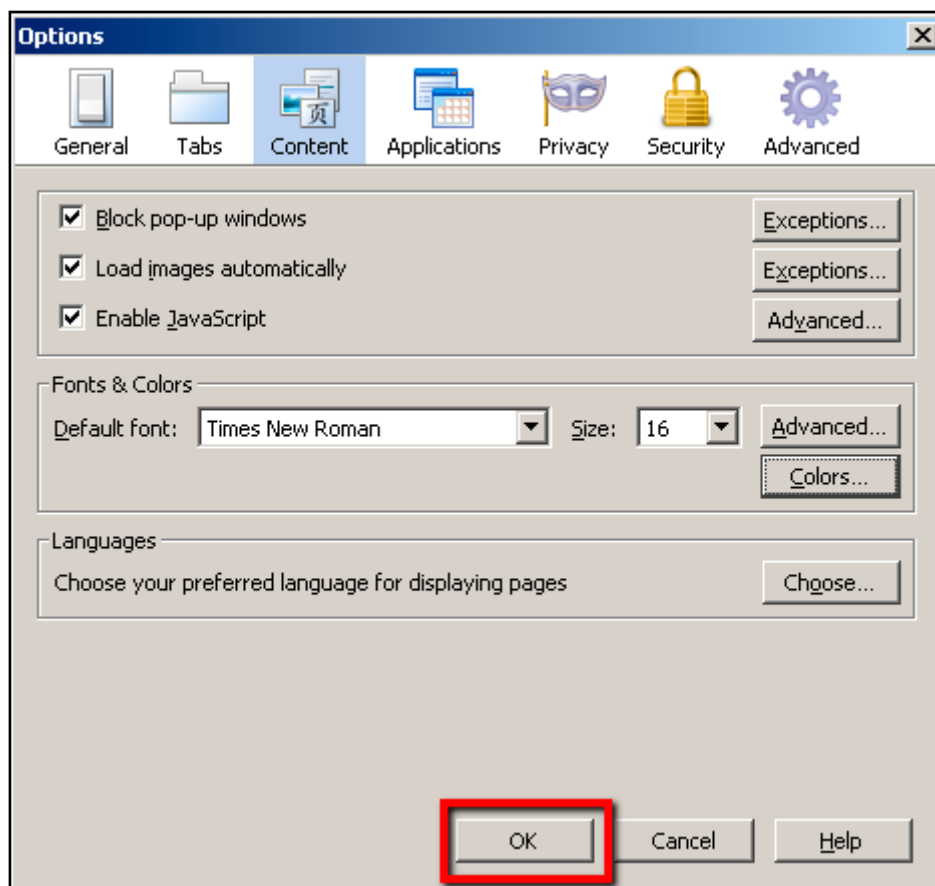

4. Check the box that says 'Allow pages to choose their own colors'

5. Click 'OK' button

6. Click 'OK' button

## Printing in Color

If your game is not printing in color, you will need to make sure you are using a color printer and if you are, then adjust your settings for your actual printer. To do this, please refer to your printer's user manual.

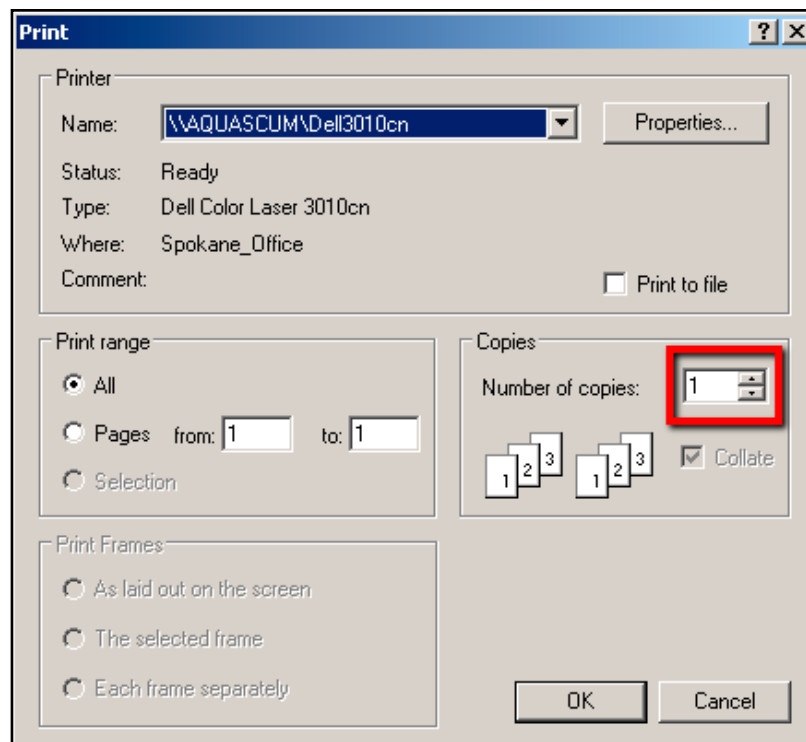

## Printing Multiple Copies

If you would like to print more than one copy of the page you are viewing, use the following instructions.

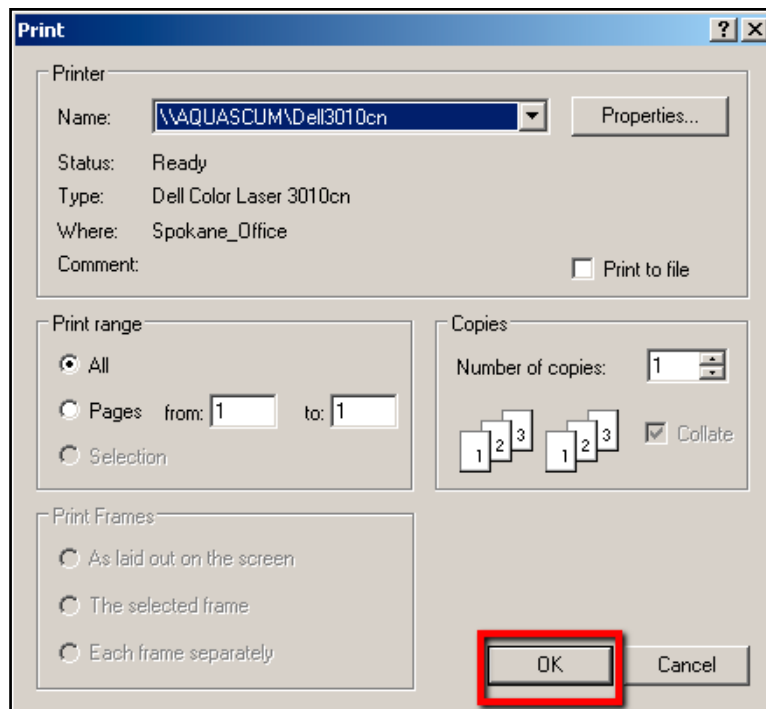

1. Click the "Print Game" icon in the upper right hand corner of your game.

2. The next screen will ask you how many copies you want to print.

3. Choose how many you'd like, and press 'OK'.

## Blank Screen

The larger the images, the longer it takes to view them on your browser. Until the images completely load, you will see only a blank screen. Some computers are so fast you never see a blank screen, while others may have a minute or two of blank screen before the images load. It all depends on your modem speed. A 14.4K modem is slower than say, a broadband (cable) connection or ISDN.

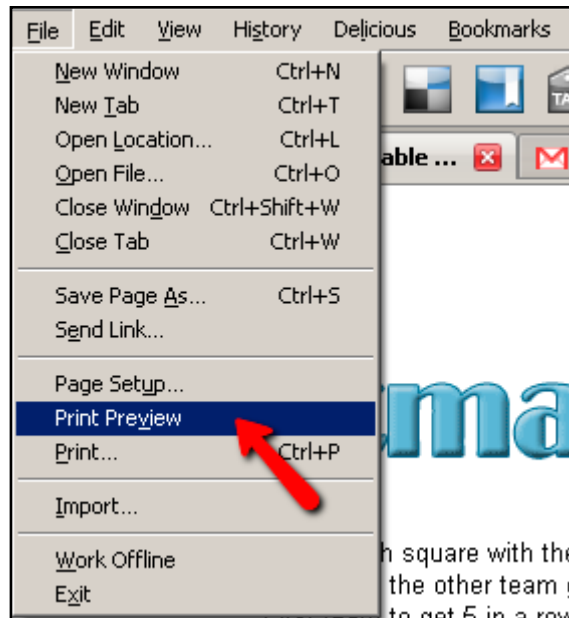

If you still have a blank screen after 5 minutes, then your browser is having a few issues, so you will need to close your browser completely (by clicking on the x in the very top right corner). Then open it up again, and log back into our Members Section. This should clear up the browser's problem.

## Printing A Blank Page

---

A blank page will print if you do not have your margins set correctly, or your background colors are not on.

1. Select 'File' menu option -> 'Print Preview'

2. If it looks correct, press 'Print'

3. If you need to make adjustments to your margins or background colors, press 'Close'.
